

## Alert

## Alarm Monitoring Utility for Innotech® Digital Controllers

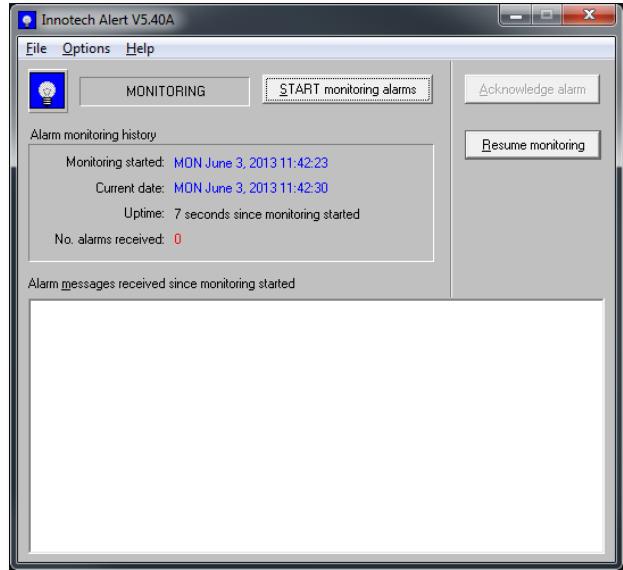

### Overview

**Alert** is a utility that reports on alarms generated by Innotech® Digital Controllers. A MAXIM II Modem/Printer Interface (MPI) is required to capture the alarms and forward the details via a modem to a computer running Alert.

**Alert** can immediately notify you once an alarm has been received through a pop-up message, sound alarms. You can also retrieve alarm activations at any time from the **Alert** logs.

### Features

- Alarm acknowledgement
- Full logging of alarm messages and user interaction
- Configurable wave file support when alarm is received
- External program execution when alarm is received
- Full support for dial-in remote access via a modem
- Easy to use interface - no special training required

### Applications

- Monitor alarms generated by Innotech Digital Controllers

### Supported Operating Systems:

- Windows® 7 Professional 64-bit & 32-bit
- Windows® XP Professional 32-bit with Service Pack 3

### Minimum System Requirements:

- Intel® Pentium® 2.8GHz dual core processor or equivalent
- 2GB of RAM
- 80GB Hard Disk Drive
- 1024 x 768 display with 16-bit video card
- CD-ROM or DVD-ROM drive
- Keyboard and Microsoft® mouse or compatible pointing device
- Requires a computer with iComm software installed
