AutoStart

Automatic Program Launching Utility

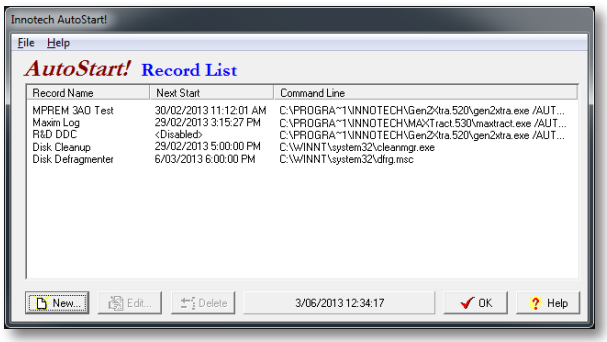
Overview

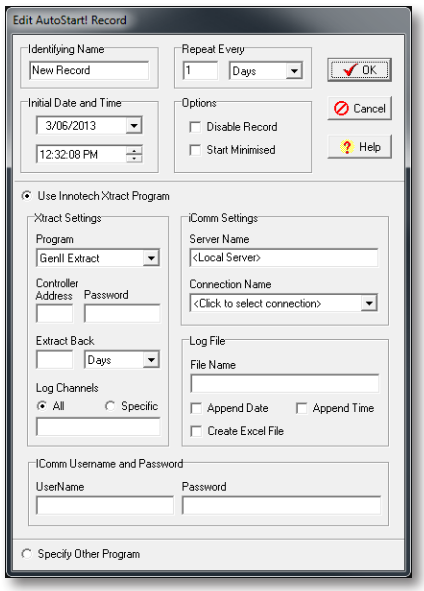
The Innotech® ***AutoStart*** software allows you to automatically launch the ***Gen2Xtract*** and ***MAXTract*** software. It allows any number of Windows® batch programs to be automatically started at regular time intervals. It is aimed at users who wish to regularly extract log data from the Genesis or MAXIM series controllers.

AutoStart has a simple Graphical User Interface which generates the command line parameters required by ***Gen2Xtract*** and ***MAXTract***.

Features

- System tray software that runs in the background
- Records are automatically loaded on start-up and saved upon exit
- Optional time & date stamping to ensure uniqueness of log file names
- iComm interface displays available server connections
- Option to launch minimized
- Allows you to specify how far back in time to extract log data
- Extract data from all or specific log channels
- Option to automatically run user-defined programs and command lines
- Simple context menu to enable/disable all or specific records
- Easy to use interface and comprehensive help system





Applications

- Automatic extraction of log data from Genesis and MAXIM series controllers on a regular basis
- Scheduling of user-specified programs

Supported Operating Systems:

- Windows® 7 Professional 64-bit & 32-bit
- Windows® XP Professional 32-bit with Service Pack 3
