

Simulator Manager

Simulator Manager for Genesis II and MAXIM Series Controllers

Overview

Simulator Manager is Windows® based software which allows you to easily and quickly create a diverse network of Genesis II or MAXIM Series controller simulators.

The simulators can be powered on, powered off or started and shutdown from the **Simulator Manager** interface. You can also change the name and address of each simulator.

Simulator Manager can be used in conjunction with any product from the Innotech® software range.

Features

- Simulator network creation and deletion
- Genesis II and MAXIM series simulator creation and deletion
- Simulator state monitoring
